Innovations
to lead us to the future
“R&D Facility Renovation Plan”

 **NIHON PARKERIZING CO.,LTD.**

New Rising Central Research Laboratories

Chemistry and Imagination

Live with all over the Surfaces

Live with all over the surfaces that are improved by surface modification technologies is our dream. To achieve our dream and to contribute to the realization of sustainable society, we are challenging to improve various surfaces with various technologies. To realize our "Vision2030", we will strengthen the central research laboratories and create another innovations.

Continuous and Challenge

to All Materials

- Metal
- Resin
- Concrete
- Glass
- Textile
- Paper

for All People

- Automobile
- Household goods
- Construction
- Healthcare
- Food
- Electronics

by All Surface Technologies

- Multi functions
- Energy saving
- Resource saving
- Nano coating
- High efficiency
- Carbon neutral

• **All in one**

Object

Market

Value

Enrich R&D to develop new fields

Total construction budget : Approximately 6.5 billion yen

Central Research Laboratories

Build in 1987

Research building : 5,600m²

Experiment building : 3,100m²

The new laboratory
is scheduled to open in 2024

Research building : 4,300m²

Experiment building : 4,500m²

Promote open innovation

*Parker
